Business Competitiveness

ETI has only been in effect since 2014, making it a relatively new tax incentive. Expertise in this field of ETI are lacking in the marketplace.

With seven years of dedicated ETI experience, we have successfully pioneered a novel business around the calculation, recovery, and submission of ETI.

The methodology used when processing ETI often leads to inaccurate claiming which in turn has a negative effect on the company's cash flow. However, etiMAX offers a full end to end ETI solution right from calculation all the way through to the refund of ETI

Unlike PAYE, UIF or SDL, less comparative ETI related data is available to companies, to verify that their claim is accurate, this is where etiMAX steps in. We ensure that your historical ETI underclaims are rectified and that future ETI benefit is calculated correctly on a monthly basis.

No competitor has emerged who uses software and technical tax expertise to verify the ETI figures calculated inside a taxpayer's payroll. Hence, we are the monopoly. Since ETI was enacted, we have built-up substantial knowledge in our business which would take a competitor years and years to acquire with regards to investment and software.

etiMAX has a capability, skill set and technology that is unheard of in South Africa.
